

# Will Epperson

I'm a Ph.D. student in the HCII at CMU advised by Dominik Moritz and Adam Perer.

My research interests lie in **developing ways to make complex systems easier to use and understand for experts and non-experts**. I am interested in how we can build tools to help users interact with their data through understandable Machine Learning, interactive visualizations, and recommended analysis. This involves building stand-alone systems for data analysis, building extensions to existing tools like Jupyter, and running human studies experiments to evaluate these systems.
